Add-on

Condor Disposals & Destructions

Track and manage data destruction and disposal in compliance relevant legislation.

The Condor Disposal & Destructions has been specially designed to assist organisations in compliance with Commonwealth and State Records Acts, Privacy laws and other relevant legislation governing how agencies must manage sensitive date, including the Telecommunications (Interception and Access) Act and Surveillance Device acts. It not only tracks and manages disposal and destructions of record data and attachments, but can also fully destroy the related audit records, enabling full compliance.

This add-on tool will be especially valuable to clients utilising the Condor Compliance module for management of covert powers, but can be deployed in any Condor suite where there is a need to manage retention and disposal of data.

1. Track records in scope for retention or destruction
Condor Disposal & Destructions enables easy compilation of records and attachments in scope, including the ability to add candidates to the list. All Condor records including matters, activities, entities, attachment and any child records can be included in scope. Each record can be individually assessed and recommended for retention or destruction.

2. Secure approvals and execution management
Necessary approvals for destruction can be configured to match your organisation's process. Review steps, approval chains, and oversight roles can all be accommodated with role-based security built into the workflow. Secure safeguards are also incorporated into the execution process to ensure that more than one person is always required to execute the destruction process.

3. Automatic or manual destruction
All records and attachments can be scheduled for automatic deletion or can be marked for manual redaction/deletion. Audit records, including data audit, event audits and bulk reports and audit reports are either deleted or all fields are nulled to ensure there is no trace of sensitive data remaining.

4. Complete and permanent deletion
All deletions are permanent and irreversible, with no mechanism available to restore any data modified or deleted using this tool, internally or by Distillery staff.

5. Accountability
Condor Disposal & Destructions helps ensure accountability and prove compliance, by providing a complete record of the disposal process, including all recommendation, approvals and actions.

Comprehensive solution

Condor Disposal & Destructions is a comprehensive solution designed to ensure that your organisation can confidently manage and permanently destroy sensitive data, fully complying with relevant legislative requirements.

- Ensure your data management aligns with the latest legal requirements, with peace of mind that sensitive information is disposed of securely and efficiently.

- Customise the approval workflows and safeguards your organisation requires, ensuring that the right people oversee every step of the destruction process.

- Guaranteed, irreversible data destruction, leaving no trace of sensitive information, safeguarding your agency against future risks.

Industry experts on your team

With over 100 years of industry experience, our team has a thorough understanding of end-to-end investigative and intelligence management processes, paired with world-class IT security knowledge. We have developed and refined a proven agile approach to designing and implementing solutions that meet your organisation's specific investigation and intelligence case management requirements.

We also know that providing the solution is just the first step in the journey. Not only do we offer an end-to-end software solution, but we also offer end-to-end customer service, ongoing support and enhancements as your environment and requirements evolve. Our clients are our top priority, and our ability to continue delivering value and impress is reflected in our many long-term partnerships with our clients, many spanning well over a decade.

Other modules include:

- Condor Investigate
- Condor Operations
- Condor Intel
- Condor Assess

Condor by Distillery Software

Founded in 1997, Distillery Software provides investigation and intelligence management solutions to law enforcement, anti-corruption, national security, border protection, regulatory and compliance and related domains. With knowledge and insight gained from over 20 years of experience, Distillery has purpose-built the Condor Suite for all intelligence-led investigation and operations management.
